

EXPLORING THE MOON

START!

Take your
brain on
a hike.

If you were an astronaut,
what would you want
to bring with you to space?

What does the expression "once in a blue moon" mean?

IF YOU COULD ASK THE MOON A QUESTION, WHAT WOULD YOU ASK?

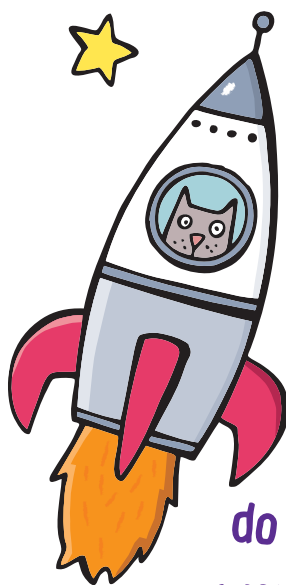

What would
life be like
without
gravity?

**WHAT WOULD THE SKY
LOOK LIKE AT NIGHT IF
EARTH HAD TEN MOONS
INSTEAD OF ONE?**

**If you could go
to the MOON,
Would you go?
WHY OR
WHY NOT?**

Imagine
riding in a
rocket
the size
of a toy.
**WHERE
WOULD
YOU
EXPLORE?**

**Which
animal
do you think
would make
the best
astronaut?
Why?**

THE
END
